The New Standard in
Intelligent Lighting Control

iLux Multi Zone Lighting and Shade Control

ASHRAE 90.1/LEED Compliant

More than just lighting control, iLux is an integrated control system. With a built-in Crestron processor, touchpanels, keypads and wireless interfaces connect directly to iLux to control lighting, shades, HVAC, AV, security and more. No other multi-zone lighting and shade controller offers the seamless integration, flexibility and expandability of iLux.

Whether as a stand-alone system or part of a complete integration solution, Crestron is your first choice for lighting control.
