# Make Your Point in HD

## Instantly annotate over multiple protected HD video windows

Only the Crestron DVPHD-GB High Definition Digital Video Annotator is HDCP compliant, displaying protected HD digital video in multiple scalable windows. A dual-window enables side-by-side comparisons from multiple sources, and simultaneous annotation on both images, producing the ultimate interactive presentation experience.

DVPHD-GB features exclusive Guidebar™ technology providing quick and easy access to essential annotation tools and complete room control from a single touchscreen interface. Guidebar keeps favorite presentation tools right at the presentor's fingertips without obscuring the 1080p image on the preview display. No tabs, drop down menus and searches through unnecessary effects. No training is required, so even guest speakers can deliver high-impact presentations with ease.
