

New 3-Series Control

**Advanced
Video Coding**

**Enhanced
Network Security**

Flash®
Run up to 1000
apps at once

Multi-tasking
Run up to 10 programs
simultaneously

**More
Memory**

**Faster,
More Powerful**

Powered by **Core 3 OS**

The Core 3 Operating System is the heart of the latest generation of Crestron control systems. 3-Series processors are designed like an IT platform, capable of running multiple programs at the same time. These network-grade appliances deliver more processing power and speed; more memory; more network connectivity and more security. Core 3 provides the framework for the most interactive and graphically rich user experience ever.
