## you do the math

Crestron DigitalMedia™ is so much more than just a switcher. DM is a complete source to display solution that manages and distributes all analog and HD digital signals over a single copper wire and fiber. DM matrix switchers accommodate any mix of composite, component, S-VIDEO, VGA, HD-SDI, DVI, HDMI with HDCP, DisplayPort, and analog and multi-channel HD audio.

DM transports any combination of media along with Ethernet, control and USB via DM cable to DM receivers at the displays. DM is a comprehensive line of HD digital matrix switchers, wall plate and rackmount transmitters and receivers, combined with powerful diagnostic and commissioning software tools for the digital age.
