

Crestron Intelligent Building Management

Crestron delivers the only solution that can monitor and control all the technology, including audio, video, and lighting in corporate facilities.

Crestron RoomView® enterprise management software enables facility-wide monitoring and control of all lighting, network technology, multimedia distribution and presentation systems on a single, fully integrated platform. Integral to “green” building design, implementation of Crestron Green Light™ environmental management solutions conserve energy, reduce costs and contribute to LEED certification.
