

avant garde

the new modern art

Take control with the world's only HD touchpanel. V-Panel is so ultra-slim and lightweight that it disappears into the wall, hangs on a standard VESA mount or compliments any décor with its sleek lines and elegantly contoured base. Edge-to-edge glass neatly finishes the minimalist form to complement today's modern lifestyle. Intelligently designed, the electronics are hidden away, leaving only the cool HD flat panel on display.
