Simply the

ONE

Crestron DigitalMedia™

ONE complete solution

Crestron DigitalMedia is a complete integrated system engineered as a comprehensive end-to-end, source-to-display solution.

ONE wire, any wire, does it all

Crestron DigitalMedia 8G pioneered the one-wire solution, but now you can choose which wire you want to use – either standard CAT5e or DM 8G cable. It's up to you.

ONE call, one company

Crestron is the one company you can rely on for support. You can depend on us anytime, anywhere. No exceptions.

ONE

Solution does it all Crestron DigitalMedia 8G+™

ONE complete engineered solution

Crestron DM 8G+ is not just a switcher, an extender or a wire. It's a complete source-to-display end-to-end engineered solution.

Digital AV is not simple, but we make it easy. Over the past few years, DM has connected hundreds of thousands of devices, and every one of them functions differently. Because of our unmatched experience, we know how to make it all work together seamlessly and reliably. And with every new installation, the power and intelligence of DM grows stronger every day. When you have Crestron DigitalMedia, you have the strength of thousands supporting you.

DM 8G+ also manages all the control and communication data that's transmitted through HDMI, DVI and DisplayPort. Now, you never have to worry about HDCP keys, EDID resolution management or CEC. DM 8G+ also makes it easier than ever by connecting your entire digital AV infrastructure using just one IP address. It doesn't get any easier than that.

ONE wire, any wire, does it all

Now, with DM 8G+, we make system installation even quicker and easier than ever. You can use standard CAT5e wire or our award-winning DM 8G Cable. Either way, DM 8G+ delivers the easiest, most reliable solution for today's digital systems.

ONE call, one company you can count on

We guarantee performance and we stand by our products with more than 60 worldwide offices and hundreds of support representatives available 24/7. You can depend on us anytime, anywhere. No questions. No exceptions.
