## Crestron Products are Compliant with Section 508 of the Rehabilitation Act

---

Crestron is dedicated to making our technology accessible and easy to use for all individuals with disabilities in compliance with Section 508 of the U.S. Rehabilitation Act.

Section 508 of the Rehabilitation Act requires Federal agencies to make their electronic and information technology (EIT) accessible to people with disabilities. Specifically, Section 508 of the Act requires that when Federal agencies develop, procure, maintain, or use EIT, Federal employees with disabilities have access to and use of information and data that is comparable to the access and use by Federal employees without disabilities.

Through our product design and engineering, Crestron is committed to exceeding these standards.
