

Tuners overview

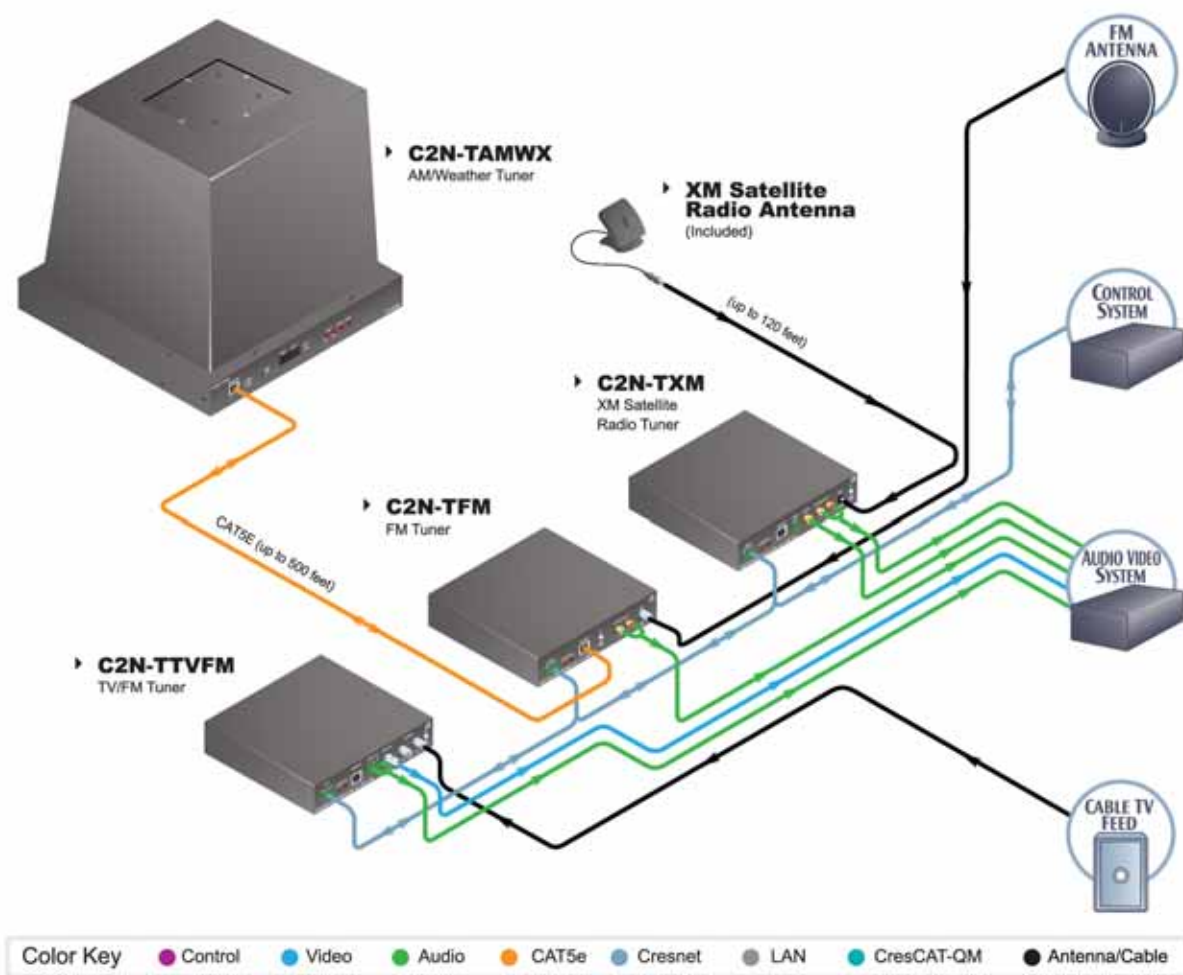

Crestron offers a complete selection of Cresnet-controllable radio and TV tuners, perfect for homes, offices, schools, and sports bars. Each model is designed to offer the utmost in performance and flexibility as part of a complete Crestron AV distribution system.

Basic tuner control can be accessed from keypads and remotes throughout any house or other facility, with easy channel selection and recall of favorite channel presets at the press of a button. More extensive control with true feedback and real-time status display can be harnessed from any wired touchpanel or 2-way wireless touchpanel, as well as from networked computers. Even channel,

category, title, and artist information can be displayed in a fully-navigable program guide for those formats that support this feature.

For large multi-room homes and businesses, Crestron tuners are 1/2-space rack-mountable making it easy and affordable to design a multi-channel, multi-format tuner system to accommodate any number of listening zones and television displays. Crestron has a tuner solution for everyone. So, while the kids are listening to their favorite rock and pop stations in their bedrooms or family room, Mom and Dad can be enjoying their own choice of music, news, and sports in the kitchen, garage, or spa.

Crestron Tuner Application
