

DM NAX[®] AUDIO EDGE DEVICES

Give your audio installs an edge.

Audio in commercial environments must meet a wide variety of needs, from presentations in large conference rooms to streaming content in common areas. Crestron DM NAX Audio Edge Devices easily connect a wide range of sources to your DM NAX[®] audio-over-IP network — and give your installs an edge over complicated setups.

All four models have unique features that enhance the AV-over-IP experience and fit perfectly into any AV-over-IP system. More choices give you more ways to bring seamless and simple network content distribution to enterprise, educational, hospitality, and retail projects.

KEY BENEFITS

- PoE powered — no local AC required
- Seamless and interoperable audio-over-IP solution
- Compatible across DM NVX[®] AV-over-IP, DM NAX audio-over-IP, AES67, and Dante[®] audio networking platforms
- Hassle-free installation and connectivity
- Onboard DSP
- Two different form factors offer the perfect fit for any AV environment

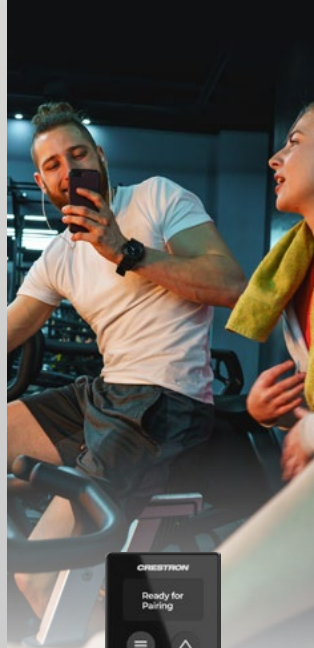

Pro audio on the network.

DM-NAX-2XLRI-1G

Give the most powerful audio equipment a line right into an AoIP network, everywhere from conference rooms to classrooms.
