Crestron Mercury™ Tabletop Conference System

> Full open SIP conferencing speakerphone
> Bluetooth® pairing with mobile phones
> USB connectivity for laptops running web conferencing or other software [2]
> Native Zoom Rooms mode [3]
> High-definition USB room camera [2]
> AirMedia® wireless BYOD presentation capability [2,3]
> HDMI® input for full-motion HD video sources [2]
> DisplayPort and USB-C™ input via optional Multihead cable (sold separately) [2]
> HDMI output for room display device [2]
> Exceptional full-duplex audio performance
> Extremely natural 2-way wideband voice quality
> Integrated 360° quad microphone array
> High-powered full-range speaker
> Limes Audio TrueVoice™ AEC technology
> High-visibility mic mute indication
> Available add-on mic pods for extra coverage
> 7” (178 mm) HD color touch screen
> Consistent and intuitive user interface
> LDAP corporate directory access (coming soon) [1]
> Microsoft® Exchange integration
> Crestron Fusion® and PinPoint™ App integration
> Built-in PinPoint beacon (coming soon) [7]
> Integrated room scheduling capabilities
> Built-in PIR occupancy detector
> Persistent occupancy awareness (patent-pending)
> Customizable welcome screen on the room display [2]
> Cloud-based provisioning (coming soon) [1]
> Web browser configuration
> Enterprise-grade security
> Dual LAN ports
> PoE+ or AC line powered [4]
> 100-240V universal power pack included
> CEC, IR, or RS-232 display control [2]
> Complete system packages
> Optional 180° swivel mount kit available
> Optional display and camera extender solutions available
> Complete Zoom Rooms packages available

Crestron Mercury™ transforms your meeting rooms into highly effective collaboration spaces. Combining all the must-have conferencing features in one easy to use device, Crestron Mercury enables people to work together and share content irrespective of location. Exceptional full-duplex audio and optional HD video afford a gratifying and productive meeting experience for all participants. Integrated room scheduling and corporate directory access [1] help to maximize efficiency. Crestron Mercury is secure, easy to deploy, easy to manage, and protects your investment by providing room usage data as part of a complete managed enterprise.

Voice Calling & Audio Conferencing

- Crestron Mercury is a full-featured VoIP conferencing speakerphone that's fully compatible with major SIP-compliant phone systems. Its advanced design provides highly-intelligible, full-duplex communication for every participant around a conference table. Dialing and answering calls is easy and intuitive using the large HD color touch screen. Corporate directory access (LDAP) enables one-touch dialing from the customer's centrally managed directory. [1]
- Pair Crestron Mercury with any mobile phone using Bluetooth® to make calls or join a call in progress. Crestron Mercury instantly transforms a personal phone call into a whole-room audio conference with clear, echo-free audio and the ability to start and stop a call, adjust volume, mute, and display caller ID on the touch screen. Bluetooth-enabled phones appear automatically on the touch screen, enabling instant connectivity with the press of a button.
- Connect a laptop computer via USB to enable enhanced audio performance for any softphone application running on the laptop.
- Mute the microphone by simply tapping the mute bar on top of the Crestron Mercury device. Its extra-bright, bi-color indicator bar ensures that the mic and mute status are clearly visible to the whole room.

BYOD Multimedia Presentation

- Connecting an HD display device to Crestron Mercury’s HDMI® output enables the presentation of all types of multimedia from BYOD sources with ease. [5]
- Its built-in AirMedia® gateway allows the wireless presentation of content from a laptop, smartphone, or tablet device via the room’s Wi-Fi® wireless network. Wired LAN connections are also supported. [2,3]
Any AV source can be plugged in via HDMI to present full-motion HD 1080p60 video on the room display, with high-fidelity audio playing through Crestron Mercury’s high-powered speaker. Sources with DisplayPort or USB Type-C™ outputs can also be connected using the optional Multihead HD Video Cable (sold separately).[2]

Crestron Mercury behaves like any USB Audio device, enabling use as a speaker and/or microphone for all types of multimedia applications running on a laptop computer.

Videoconferencing & Web Collaboration

- Crestron Mercury can turn any space into a videoconference room by simply connecting a laptop running Skype® for Business, Cisco WebEx®, GotoMeeting®, Slack®, or another web conferencing or UC application.[2]
- Connect the laptop via USB and Crestron Mercury provides enhanced audio along with a high-definition view of the whole room through the included USB camera.[2]
- No more huddling around a laptop to interact and share content with remote participants. Connect the laptop’s HDMI output (or DisplayPort or USB Type-C via the optional Multihead cable) to allow the whole room to view content and camera images on the main display.[2]

Sound Quality

Crestron Mercury’s advanced design facilitates perfectly natural conversations with exceptional audio fidelity and pickup. Its 360° quad microphone array faithfully captures voices at every seat at the table. Its high-powered, full-range speaker produces full, rich and real sounding audio for both voice and program material. Limes Audio TrueVoice™ AEC technology achieves transparent full-duplex performance free of distracting echo or noise. Wideband audio codec support allows for full-spectrum, bidirectional voice communication.

Flexibility

Crestron Mercury’s unique sloped shape is not only attractive and unobtrusive; it’s also functional, allowing for placement at either the center or head of the table. Large or long tables can easily be accommodated by adding up to two mic pods (sold separately), which may be daisy-chained or individually home-run to the base unit. Each mic pod includes a remote mute button and indicator.[4]

Two Crestron Mercury models are offered to accommodate different applications and budgets. The base package (CCS-UC-1 W/PS KIT) supports full SIP VoIP speakerphone, Bluetooth, and USB Audio capabilities.

The video package (CCS-UC-1-AV W/PS KIT) adds capabilities for multimedia presentation and videoconferencing, and includes a USB camera. Both models come complete with all required cables and are powerable using either PoE+ or the included 100-240V universal power pack.[4]

HD Color Touch Screen

Its extra-large, high-definition touch screen makes Crestron Mercury easy for everyone to use, whether dialing or answering calls, looking up contacts, managing the room schedule, or connecting and controlling mobile devices. The full-color user interface provides quick access and intuitive operation, and affords a consistent user experience from room to room.

Zoom Rooms Mode

Native Zoom Rooms mode enables Crestron Mercury to be used as a high-performance conferencing speakerphone and touch screen control panel for a zoom Rooms software-based conferencing and collaboration solution. Crestron’s partnership with Zoom brings together all the features and user-friendliness of a Zoom Rooms solution with the exceptional audio performance and secure enterprise integration capabilities of Crestron Mercury.

The CCS-UC-1 device easily replaces the individual speaker, microphone, and tablet components of a typical Zoom Rooms setup. Its 7” color touch screen delivers the same user-friendly Zoom Rooms experience as a typical tablet, but without the risk of misplacing the device. Instead of Wi-Fi, Crestron Mercury uses wired Ethernet and USB connections to ensure reliable connectivity at all times.[2]

Crestron also offers bundled Crestron Mercury Zoom Rooms Kits for customers who desire a convenient turnkey system solution. For more information, please visit: http://www.crestron.com/zoomrooms.
Workplace Integration

Crestron Mercury integrates directly with Microsoft Exchange or Crestron Fusion®, allowing seamless room scheduling and automation for any number of Crestron Mercury-equipped rooms. Crestron Mercury welcomes attendees to the room with a customizable on-screen confirmation of the scheduled meeting, and provides gentle notifications as the meeting progresses to show the time left and what’s scheduled next for the room. Using the touch screen calendar application, the meeting can be extended or a new meeting can be scheduled.

The Crestron® PinPoint™ App can be used to locate and reserve any available Crestron Mercury-equipped room in the facility. As you enter the room, the built-in PinPoint beacon(1) detects your presence and provides personalized feedback and connection options on your mobile device, letting you instantly start your presentation. Crestron Mercury also works with Crestron room scheduling touch screens installed outside the room, all managed through Crestron Fusion.

Crestron Mercury also detects room occupancy using a patent-pending combination of motion and voice activity detection. Its built-in passive infrared detector initially senses when someone is present in front of the touch screen, and then voice activity is used to maintain the room’s occupied status as long as anyone in the room is talking. Occupancy detection provides numerous benefits, such as automating the system to power down to save energy when all parties leave the room, or making the room available on the calendar if no one shows up for a scheduled meeting.

Management and Security

Crestron Mercury is an enterprise-grade appliance, ideally equipped for mass deployment throughout any-sized corporation, university, medical, military, or governmental facility. Cloud-based provisioning(1) enables complete network configuration in advance of hardware delivery, with touchless updates following installation. Devices can also be configured individually using a computer web browser. Crestron Fusion management enables monitoring and logging of room and equipment usage, as well as centralized help desk support. Advanced security features include 802.1x authentication, Active Directory credential management, LDAP directory management(1), SRTP, SSH, TLS, and HTTPS. Dual LAN ports allow VoIP or AirMedia traffic to be isolated on a secondary network, and 802.3at PoE+ compatibility enables Crestron Mercury to be powered through its primary LAN connection.(4)

SPECIFICATIONS

Communications

Ethernet: 10/100 Mbps (x2), auto-switching, auto-negotiating, auto-discovery, full/half duplex, TCP/IP, UDP/IP, CIP, DHCP, SSL, TLS, SSH, SFTP (SSH File Transfer Protocol), SRTP, IEEE 802.1X, Active Directory authentication, LDAP(1), digest access authentication, password login, HTTPS secure provisioning, IEEE 802.3at Type 2 compliant

</table>

VoIP: Open SIP, SDP, IETF SIP (RFC 3261 & companion RFCs), DTMF tone generation (RFC 2833 & in-band), low-delay audio packet transmission, adaptive jitter buffers, packet loss concealment

Bluetooth: Bluetooth 4.0 device pairing for wideband speech (HFP) and multimedia audio streaming (A2DP), Crestron PinPoint proximity detection beacon(1)

USB Device: USB 2.0 wired interface for computer running web conferencing software or USB Audio

USB Host(2): USB 2.0 for camera input

RS-232(2): 2-way display device control and monitoring up to 115.2k baud with software handshaking

IR/Serial(2): 1-way display device control via infrared up to 1.1 MHz or serial TTL/RS-232 (0-5 Volts) up to 19.2k baud

HDMI(2): HDCP 1.4, EDID, CEC

AirMedia(2): Crestron AirMedia presentation gateway, connects to mobile devices via wired or wireless Ethernet(3)

Mic Pod: A/B bus protocol, single master, multiple slave; synchronous data, multichannel I2S/TDM to I2S/TDM

Audio

Codec Support: G.711, G.722, G.729

AEC: Limes Audio TrueVoice acoustic echo cancellation, automatic mic mixing, automatic gain control, and dynamic noise reduction; full-duplex IEEE 1329 Type 1 compliant
Microphones: Quad mic array with (4) cardioid electret elements; Pickup Range: 20 ft (6 m) typical
Speaker: Full range speaker; Amplifier Power: 11 Watts maximum; Output Volume: 95 dB SPL at 0.5 m; Frequency Response: 90 Hz to 22 kHz

Video

Content Input Signal Types: HDMI (DVI & Dual-Mode DisplayPort compatible), AirMedia
Camera Input/Output Signal Type: USB
Display Output Signal Types: HDMI (DVI compatible)
Content Input Resolutions: Up to 1920x1080@60Hz (1080p60)
Display Output Resolutions: 1280x720@50Hz (720p50), 1920x1080@50Hz (1080p50), 1920x1080@60Hz (1080p60)

Occupancy Sensor

PIR Detection Range: 6 ft (1.83 m) in front of touch screen, wakes system (touch screen and video display) and reports room occupancy to Crestron Fusion
Voice Activity Detection: Keeps room occupancy, touch screen, and display active as long as speech is detected through the microphones

Touch Screen

Display Type: TFT active matrix color LCD
Size: 7 inch (178 mm) diagonal
Aspect Ratio: 16:9 HD 720
Resolution: 1280 x 720 pixel
Touch Screen: Capacitive, multi-touch capable
Character Support: Unicode UTF-8
Language Support: Arabic, Chinese (Simplified), Chinese (Traditional), Czech, Danish, Dutch (NL), English (UK), English (US), Finnish, French (FR), German (DE), Greek, Hebrew, Hungarian, Italian (IT), Japanese (JP), Korean, Norwegian (NO), Polish, Portuguese, Portuguese (Brazilian), Romanian, Russian (RU), Slovak, Spanish (ES), Swedish, Thai

Buttons & Indicators

Mic Mute Symbol & Light Bar: (2) Capacitive "buttons" with bi-color LEDs, either button toggles between mute and unmute, the symbol LED blinks green when the unit is powering up, all LEDs illuminate red when the mic is muted (and a red border appears around the touch screen display), all LEDs illuminate green when the mic is unmuted if a USB device is connected or a SIP call is active

Connectors

G: (1) 6-32 screw; Chassis ground lug
LAN: (1) 8-pin RJ45 connector, female; 10Base-T/100Base-TX Ethernet port; PoE+ PD port
AUX: (1) 8-pin RJ45 connector, female; 10Base-T/100Base-TX Ethernet port; Alternate LAN connection for separate SIP or AirMedia network
IR: (1) 3.5 mm mini-phone jack; IR output port for display device control
COM: (1) 3.5 mm TRS mini phone jack; Bidirectional RS-232 port for display device control
USB B: (1) Micro-USB Type B connector, female; USB 2.0 device port; 6 ft (1.83 m) micro-B male to A male USB cable included
HDMI OUT: (1) HDMI Type A connector, female; Digital video/audio output for display device
HDMI IN: (1) HDMI Type A connector, female; Digital video/audio input for presentation content source; DisplayPort and USB Type-C compatible using CBL-MULTI-HD-6 Multihead cable (sold separately)
MIC POD 1 – 2: (2) RJ9 4P4C connectors, female; For connection of up to two CCS-UCA-MIC microphone pods (sold separately)
USB/ACC: (1) USB Type A connector, female; USB 2.0 host port; Powers optional CBL-MULTI-HD-6 Multihead cable
USB/CAM: (1) USB Type A connector, female; USB 2.0 host port for camera
24V DC 2.5A: (1) 2.1 x 5.5 mm DC power connector; 24 Volt DC power input for universal power pack
## Models & Accessories

### Available Models

**CCS-UC-1 W/PS KIT:** Crestron Mercury™ Tabletop Conference System w/Universal Power Pack

**CCS-UC-1-AV W/PS KIT:** Crestron Mercury™ Tabletop Conference System, Video Package w/Universal Power Pack

### Included Accessories

**PW-2420RU:** Desktop Power Pack, 24VDC, 2A, 2.1mm, Universal (Qty. 1 included)

**CCS-CAM-USB-F-100:** Custom Serial Interface Cable (Qty. 1 included with CCS-UC-1-AV W/PS KIT)

**CBL-MULTI-HD-6:** Multihead cable (sold separately).

**HDMI® Cable, Thin, Type A Male-to-Male, 6 ft (1.83 m)** (Qty. 1 included with CCS-UC-1-AV W/PS KIT)

**CBL-HD-THIN-HS-6:** HDMI® Cable, Thin, Type A Male-to-Male, 6 ft (1.83 m) (Qty. 1 included with CCS-UC-1-AV W/PS KIT)

**CBL-HD-20:** Crestron® Certified HDMI® Interface Cable, 18 Gbps, 20 ft (6.1 m) (Qty. 1 included with CCS-UC-1-AV W/PS KIT)

**STIRP:** IR Emitter (Qty. 1 included with CCS-UC-1-AV W/PS KIT)

### Available Accessories

**CBL-MULTI-HD-6:** Multihead HD Video Cable, 6 ft (1.8 m) (Qty. 1 included with CCS-UC-1-AV W/PS KIT)

**SW-FUSION:** Crestron Fusion® Enterprise Management Platform

**CNSP-XX:** Custom Serial Interface Cable

**CEN-SWPOE-16:** 16-Port Managed PoE Switch

**SW-FUSION:** Crestron Fusion® Enterprise Management Platform

### Compliance

### Power

**Power Pack (included):** Input: 100-240 Volts AC, 50/60 Hz

**Output:** 2.5 Amps @ 24 Volts DC

**Model:** PW-2420RU

**Power over Ethernet:** IEEE 802.3at Type 2, Class 4 (25.5 W) PoE+

**Powered Device**

**Power Consumption:** 20 Watts typical

### Environmental

**Operational Temperature:** 32° to 95° F (0° to 35° C)

**Storage Temperature:** -4° to 160° F (-20° to 70° C)

**Humidity:** 5% to 95% RH (non-condensing)

**Heat Dissipation:** 123 BTU/hr

### Dimensions

**Height:** 4.11 in (105 mm)

**Width:** 8.92 in (227 mm)

**Depth:** 12.74 in (324 mm)

### Weight

5.5 lb (2.5 kg)

### Notes:

1. LDAP corporate directory access, built-in PinPoint beacon, and cloud-based provisioning are not enabled at this time. These features will be enabled in the future via firmware update.
2. Only enabled on model CCS-UC-1-AV W/PS KIT.
3. AirMedia support includes the same essential functionality as the AM-101 AirMedia Presentation Gateway with the exclusion of quad view, moderator mode, and device mirroring.
4. When using PoE+ or the included power pack (model PW-2420RU), if one or two mic pods are connected, the system MUST be powered using the power pack. PoE+ cannot be used to power the system if any mic pods are connected. When using PoE+, make sure the network switch supports PoE+ (802.3at Type 2). Regular PoE (802.3af or 802.3at Type 1) cannot be used to power the system. Crestron recommends using the CEN-SWPOE-16 16-port switch, which supports PoE+. Please be aware, the CEN-SWPOE-5 5-port switch does not support PoE+ and cannot be used to power the system.
5. A complete Zoom Rooms solution requires a mini PC or Mac computer running Zoom software, a Zoom Rooms subscription, plus additional peripherals and cables. Visit [https://zoom.us/zoomrooms](https://zoom.us/zoomrooms) for more information about Zoom Rooms capabilities, hardware requirements, and subscription plans. For design assistance, refer to Crestron True Blue [Online Help Answer ID #5829](https://zoom.us/zoomrooms).
6. HDMI connections require an appropriate adapter or interface cable to accommodate a DVI or Dual-Mode DisplayPort signal. CBL-HD-DVI interface cables are available separately. DisplayPort and USB Type-C input capability can be enabled using the CBL-MULTI-HD-6 Multihed cable (sold separately).
Crestron Mercury™ Tabletop Conference System

This product may be purchased from an authorized Crestron dealer. To find a dealer, please contact the Crestron sales representative for your area. A list of sales representatives is available online at www.crestron.com/salesreps or by calling 800-237-2041.

This product is covered under the Crestron standard limited warranty for 3 years, except for the touch screen display which is covered for 90 days. Refer to www.crestron.com/warranty for full details.

The specific patents that cover Crestron products are listed online at: patents.crestron.com.
