The Crestron® 4K HDMI® over HDBaseT® Transmitter (HD-TX3-C) delivers a professional-grade digital HD AV signal extension solution for use in the home, classroom, auditorium, or corporate boardroom. Without any special setup or configuration, the HD-TX3-C connects directly to an HDBaseT display device or receiver, enabling the transmission of ultra high-definition digital video and audio over wire runs up to 330 feet (100 meters) using a single CAT type twisted pair cable.

NOTE: When paired with the HD-RX3-C receiver, the HD-TX3-C provides for the extension of IR and bidirectional RS-232 control signals in addition to video and audio.

### 4K Ultra HD Signal Extension

Using HDBaseT technology, the HD-TX3-C allows for the extension of uncompressed HDMI signals over a single CAT type twisted pair cable. In addition to HDMI, it is also compatible with DVI and DisplayPort Multimode sources. Without relying on signal-degrading compression or inferior HDMI signal boosting, HDBaseT reliably transports the full resolution signal from source to display — intact and uncompromised.

The HD-TX3-C handles uncompressed Full HD 1080p, Ultra HD, 2K, and 4K video signals with support for 3D, Deep Color, and HDCP. Audio capabilities include support for high-bitrate 7.1 audio formats like Dolby® TrueHD and DTS-HD Master Audio™ as well as uncompressed linear PCM. All signals are transported over a single CAT type cable, supporting 1080p, WUXGA, and 2K signals at distances up to 330 feet (100 m) using Crestron DM® Ultra or DM 8G® Cable, or third-party CAT5e. Higher resolutions up to UHD and 4K are supported at distances up to 330 feet (100 m) using DM Ultra Cable, 230 feet (70 m) using DM 8G Cable, or 165 feet (50 m) using CAT5e.

---

...And Control Too!

When paired with an HD-RX3-C receiver, the HD-TX3-C provides for the extension of IR and bidirectional RS-232 control signals in addition to video and audio.

### HDBaseT® Certified

Crestron HDMI over HDBaseT products are designed using HDBaseT Alliance specifications, ensuring interoperability with other HDBaseT certified products. Via its HDBaseT output, the HD-TX3-C can be connected directly to an HDBaseT compliant display device without requiring a separate receiver.

### Uncompromised and Uncomplicated

Crestron HDMI over HDBaseT products afford a very dependable signal extension solution that is simple to implement. No special configuration or programming is required — just connect your source and display and enjoy high-quality video and audio from across the room — or the other end of the house.

The HD-TX3-C can be mounted in a single-gang wall box, or attached to any flat surface or inside an equipment rack. Linking the HD-TX3-C to an HDBaseT display, or to the HD-RX3-C receiver, requires just one CAT type cable. Crestron offers the cable and connectors for a complete, easy, and reliable wiring solution. A range of professional AV interface cables is also available to complement the HD-TX3-C for a total custom installation solution.

NOTE: Common resolutions are shown; other custom resolutions are supported at pixel clock rates up to 300 MHz

**Audio**

Input Signal Types: HDMI, DisplayPort Multimode®

Output Signal Types: HDBaseT

Formats: Dolby Digital®, Dolby Digital EX, Dolby Digital Plus, Dolby® TrueHD, DTS®, DTS-ES, DTS 96/24, DTS-HD High Res, DTS-HD Master Audio™, up to 8ch PCM

**Communications**

RS-232: Extends 2-way serial device control signals up to 115.2k baud[3]

IR: Extends 1-way IR device control signals up to 455 kHz[3]

HDBaseT: Passes HDCP, EDID, & CEC

HDMI: Passes HDCP, EDID, & CEC

**Connectors**

HDMI IN: (1) 19-pin Type A HDMI female; HDMI digital video/audio input; Also supports DVI or Displayport Multimode®

IR IN: (1) 2-pin 3.5mm detachable terminal block; IR repeater input port[3]; IR signal input up to 455 kHz

COM: (1) 3-pin 3.5mm detachable terminal block; Bidirectional RS-232 port[3]; Up to 115.2k baud, software handshaking support

24VDC 0.75A (rear): (1) 2.1 x 5.5 mm DC power connector; 24 Volt DC power input (PW-2407WU power pack included)[5]

Ground (rear): (1) Flying lead, chassis ground connection

HDBaseT OUT (rear): (1) 8-pin RJ45 female, shielded; Connects to the HDBaseT IN port of an HD-RX3-C receiver or other HDBaseT device via CAT5e, Crestron DM-CBL-8G, or Crestron DM-CBL-ULTRA cable[1]
HD-TX3-C  4K HDMI® over HDBaseT® Transmitter

Controls & Indicators

PWR/LINK:  (1) dual-color amber/green LED, indicates operating power supplied via local power pack or HD-RX3-C, and indicates HDBaseT link status and HDMI input signal presence
HDBaseT OUT (rear):  (2) LEDs, green LED indicates link status, amber LED indicates video and HDCP signal presence
SW1 (side):  (1) slide switch, enables hot plug detect

Power Requirements

Power Pack:  0.75 Amp @ 24 Volts DC;
100-240 Volts AC, 50/60 Hz power pack, model PW-2407WU, included[9]

Environmental

Temperature:  32° to 104°F (0° to 40°C)
Humidity:  10% to 90% RH (non-condensing)
Heat Dissipation:  2 BTU/hr

Enclosure

Construction:  Metal, black finish with white or black polycarbonate label overlay
Flush Wall Mount:  1-gang mountable in an extra-deep electrical box (2-1/2 inch deep minimum), requires decorator style faceplate (not included)
Surface Mount:  Surface mount bracket included
Rack Mount:  Attachable to a single 19-inch EIA rack rail

Dimensions

Height:  4.12 in (105 mm)
Width:  1.72 in (44 mm)
Depth:  2.35 in (60 mm)

Weight

5.8 oz (165 g)

MODELS & ACCESSORIES

Available Models

HD-TX3-C-B:  4K HDMI® over HDBaseT® Transmitter, Black
HD-TX3-C-W:  4K HDMI® over HDBaseT® Transmitter, White

Included Accessories

PW-2407WU:  Wall Mount Power Pack 24VDC, 0.75A, Universal
(Qty. 1 included)

Available Accessories

DM-CONN:  Connector for DM-CBL-ULTRA
DM-CBL-6G-NP:  DigitalMedia 8G™ Cable, non-plenum
DM-CBL-6G-P:  DigitalMedia 8G™ Cable, plenum
DM-8G-CONN-WG:  Connector with Wire Guide for DM-CBL-8G
DM-8G-CONMP:  Crimping Tool for DM-8G-CONN-WG
DM-8G-CONMP:  Connector for DM-CBL-8G
DM-8G-CRIMP:  Crimping Tool for DM-8G-CONN
CNSP-112:  2-pin to Mini-phone Cable
CNSP-XX:  Custom Serial Interface Cable
CBL Series:  Crestron® Certified Interface Cables

Notes:

1. The maximum cable length for HDBaseT is dependent upon the type of cable and resolution of the video signal. Refer to the “Maximum HDBaseT Cable Lengths” table for a detailed overview. Shielded cable and connectors are recommended to safeguard against unpredictable environmental electrical noise which may impact performance at resolutions above 1080p. All wire and cables are sold separately.
2. HD-RX3-C sold separately or as part of the HD-EXT3-C 4K HDMI over HDBaseT Extender package.
3. IR and RS-232 control signals are only supported when paired with an HD-RX3-C receiver.
4. HDMI requires an appropriate adapter or interface cable to accommodate a DVI or DisplayPort Multimode signal. CBL-HD-DVI interface cables are available separately.
5. When the HD-TX3-C transmitter is connected to a HD-RX3-C receiver, only one power pack should be connected to either the transmitter or the receiver, not both. Power is supplied to the secondary device over the HDBaseT connection. Please note, the HD-TX3-C and HD-RX3-C are not PoH compatible. They cannot be powered by, or supply power to, another HDBaseT device. They may however be connected to such devices without risk of malfunction.
