

The Kleingers Group

INTRODUCTION

The Kleingers Group provides a comprehensive range of civil and transportation engineering, land surveying, and landscape architecture services to a diverse mix of public and private sector clients. Through lasting relationships with developers, architects, and local and state governmental agencies they've successfully built an organization that improves people's lives through the design of new infrastructures.

"BY STANDARDIZING ON CRESTRON, WE'VE CREATED A DYNAMIC AND FORWARD-THINKING WORK ENVIRONMENT, PERFECT FOR OUR EMPLOYEES TO EXCEL AND OFFER THEIR CLIENTS THE BEST EXPERIENCE POSSIBLE."

THE CHALLENGE

The Kleingers Group had more than 100 employees scattered across multiple buildings in their Cincinnati location. They've since been brought together under one roof at the company's new 35,000-square-foot office space. A critical goal of the project was to revolutionize the meeting experience with new and intuitive conferencing, collaboration, and scheduling technology to help employees be more productive.

THE SOLUTION

After an exhaustive review of available options, The Kleingers Group decided Crestron workplace technology was clearly the best choice to meet the challenge and provide employees with a smooth transition so they could hit the ground running in the new office.

"FROM THE BEGINNING, WE KNEW WE NEEDED A RELIABLE AND HIGH-QUALITY SOLUTION. WHICH IS EXACTLY WHY WE SELECTED CRESTRON TO SERVE AS THE TECHNOLOGY BACKBONE FOR OUR MEETING SPACES."

THE TECHNOLOGY

For The Kleingers Group, communication is at the core of their exceptional customer service. Every project requires constant evaluation and follow-up meetings to keep everyone up to speed. With Crestron room control, employees can launch meetings and presentations with just one tap on the touch screen.

Crestron DM NVX™ AV-over-IP technology powers video distribution in the training room and conference rooms throughout the building, enabling employees to instantly share flawless high resolution images, such as 3D traffic study animations. DM NVX is also used to deliver digital signage content, including the latest company news, in communal and dining areas, which helps drive employee engagement.

Crestron room scheduling has taken the hassle out of booking meeting rooms. In addition to being able to book rooms from their desks or the Crestron app, employees can easily do it on the fly. The scheduling touch screen mounted just outside each room includes lightbar indicators that clearly show room status. With just a glance down the hall, employees can find an available room and book it on the spot.

Crestron technology has improved the employee experience in the training center, as well. A Crestron touch screen located at the podium gives presenters complete control of audio and video. With the entire training center powered by Crestron, employees and their guests enjoy training sessions and webinars that exceed expectations, thanks to the exceptional audio and video quality.

"OUR FIRM CONSTANTLY OPERATES AT A FAST PACE TO DELIVER PROJECTS ON-TIME AND ON-BUDGET. CRESTRON ROOM SCHEDULING HAS MADE IT POSSIBLE FOR OUR EMPLOYEES TO MANAGE THESE NEW AREAS WHILE KEEPING PROJECTS ON TRACK."

RESULTS

With the help of Crestron, The Kleingers Group has created a work environment where technology assists the employees in consistently delivering quality work. Employees enjoy using it and have noticed the positive impact it's made on their daily workflow.

"We pride ourselves on a positive company culture and producing great results for our clients. Crestron has provided us the technology infrastructure to continue doing just that."
