

AUTOMATE VX MULTI-CAMERA SPEAKER TRACKING SOLUTION

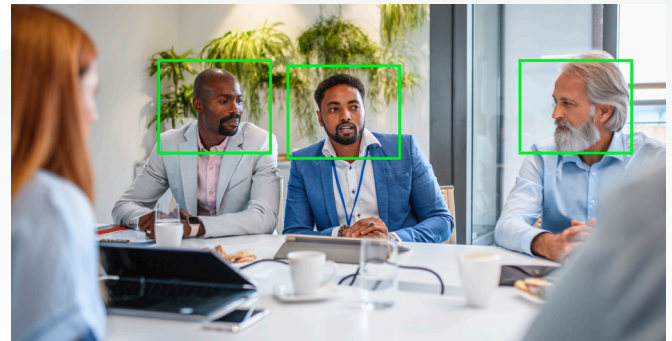

Make meetings more effective from every perspective

Meetings in large and high-profile spaces are more collaborative when everyone can engage naturally. The Automate VX solution provides cinematic video that makes remote participants feel like they're in the room.

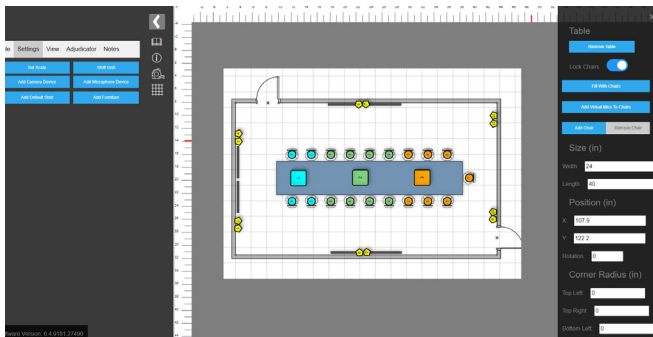

Production-quality meetings, without a crew

Automatic clean cuts follow the conversation with full-resolution close-ups of active speakers and with no camera motion. Match your meeting style with custom-composited views from cameras around the room.

Call the shots with Visual AI

Visual AI for autoframing ensures whoever is speaking is always centered in the frame, even if they move. The Visual AI Direction feature automatically switches cameras based on where the speaker is looking.

Visualize how your room will operate

Intelligent Video Room Designer lets you easily preview and configure the solution. Place cameras and mics with drag-and-drop functionality, then export your design and upload to the system — no coding needed.

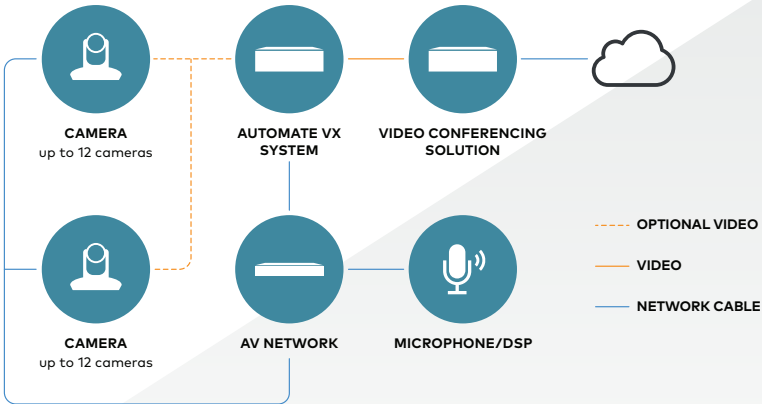

Match your viewing experience to your meeting

Place cameras throughout the room and choose between a wide variety of microphones, giving you the flexibility to meet the needs of rooms of all shapes and sizes. Easily create and recall different room scenarios.

How your Automate VX solution comes together

Same great experience — any platform

The Automate VX solution is all about flexibility. It's certified for Microsoft Teams® software and supports Zoom Rooms® software or any other conferencing platform. Whichever you use, launch your broadcast-quality meeting with just one touch.

1 Beyond Cameras

Pairs of p-Series cameras are ideal for switching between seated or standing speaking positions in the room. i-Series cameras have built-in Visual AI for presenter tracking, which is ideal for presentation areas.

Automate VX Systems

Switches and composites up to 12 camera feeds and provides output to video conferencing platform of choice.

	Automate VX System	Automate VX Pro System
Output via HD SDI, NDI® HX, and USB 3.0*	✓	✓
HD-SDI Inputs	3	7
NDI® HX Inputs	5	12

*SDI to USB 3.0 converter included for connection to external conferencing system.

The purchase of 1 Beyond Camera Systems Remote Professional Services (IV-PROSERVICE-1B) is required with the purchase of each Automate VX2 (IV SAM VX2 S) or Automate VX2 Pro (IV SAM VX2 P). The purchase of Crestron Remote Professional Services and the provision of an Equipment Proposal is optional for Crestron Intelligent Video Certified Engineers (IVC-E), subject to verification by Crestron. See Crestron Certification at <https://www.crestron.com/Products/Workspace-Solutions/Intelligent-Video/1-Beyond-Intelligent-Video/IV-PROSERVICE-1B>
