Crestron Room Scheduling
Connecting people with the right space and technology

Visit crestron.com/roomscheduling to learn more
A smart workplace starts with a smart scheduling system

The modern workplace is fast-paced, flexible, and dispersed. With touch screens, scheduling software, and illuminated room availability indicators, Crestron provides everything you need to make everyone more efficient, connected, and collaborative across all meeting spaces.

1. Touch screens
   - Choose from a range of secure, enterprise-grade, PoE touch screens with versatile mounting options. 5”, 7”, and 10” available.

2. Room availability indicators
   - All it takes is a quick glance down the hallway to determine the status of meeting rooms.
     - Room Availability Light Bar
     - Room Availability Sign - Ceiling Mount
     - Room Availability Sign - Wall Mount
     - Room Availability Status Indicator - Wall Mount

3. Optimize your in-room experience
   - AirMedia® 2.0 technology shows meeting details on the room display, so you’ll always know if you’re in the right place at the right time. When not in use for meetings, you can leverage AirMedia for digital signage.

With the powerful Crestron scheduling platform and touch screens, anything is possible.

Meeting information
- Immediately see if the room is booked and for how long.

Power at your fingertips
- Advanced functionality menu lets you check-in, extend the current meeting, end the meeting early, and more.

Room availability indicators
- All it takes is a quick glance down the hallway to determine the status of meeting rooms.

Custom GUI
- Unique backgrounds, logos, and color schemes can be implemented to reinforce your branding.

High Visibility GUI
- High-contrast screen changes colors to enhance accessibility (WCAG 2.0 part 1.4.6 for Contrast (Enhanced)).

Reserve on the spot, on the app, or at your desk
- Quickly book an available room in two taps. Built-in Crestron scheduling software directly connects to the most popular calendaring platforms:

Choose the application that’s right for you
- Our open architecture allows you to run standard Crestron software or one of our partners’ applications.
Transform every space into a productive meeting space

Meeting spaces have evolved beyond the traditional conference room. Crestron provides flexible solutions to easily add wireless presentation, digital signage, and scheduling capabilities in all the places people meet. All that’s needed is a display.

Open spaces
Nothing brings productivity to a screeching halt like not having a place to meet. With Crestron, teams can gather anywhere there’s an available display – lobbies, stand-up tables, cafeterias, and more.

Non-reservable spaces
Some meeting spaces are used without scheduling, but people still need to find them easily. With an occupancy sensor driving a room availability indicator, these spaces suddenly become easy to find.

Deploy and evolve faster and more efficiently—from the Cloud

Crestron XiO Cloud is a revolutionary IoT-based service that enables you to remotely and securely deploy and evolve Crestron room scheduling technology, including TSS and TSW touch screens anywhere in the world all through a standard web browser.
