

Manage the flow of people and ideas

Crestron Room Scheduling

Smooth the way to a better experience – for everyone.

Crestron room scheduling does more than make it easy to book a space. It gathers intelligence, facilitates productivity, opens up possibilities so that your organization keeps moving. And it does it all easily and effectively at every touch point – from installation to operation – one complete platform.

Create your solution

Touch Screens. Choose from a range of secure, enterprise-grade, PoE touch screens to suit every application. 5", 7", and 10" options available in black or white with versatile mounting options.

Room Availability Indicators.

Illuminated signage makes it easy to find and determine the status of meeting rooms.

Room Availability Light Bar

Room Availability Sign - Ceiling Mount

Room Availability Sign - Wall Mount

Room Availability Status Indicator - Wall Mount

PoE Occupancy Sensor.

Communicates directly with touch screens to instantly update room status and gather usage data.

70 Series Scheduling Touch Screens

Designed to deliver a superior level of performance, responsiveness, security, and options

Proximity Sensor detects motion and awakens screen upon approach

Extend meeting times or reserve a later time

See the day's schedule and check availability

Book your room on an app, from a desk, or on the spot

Sharper screen resolution that communicates with perfect clarity

Customize your experience

- ✓ Add logos, change colors to reinforce company identity
- ✓ Customize UI for a tailored experience
- ✓ Auto brightness: Day/Night mode
- ✓ Employ static background or video loops as a screen saver while in use

Enjoy the freedom to change direction without changing hardware

Crestron lets you decouple your software from your hardware so you can change applications as your needs change. Choose to directly connect or support a native experience.

Simply select your hardware and run whichever experience works best for you.

Partner Software

Streamline installation, management, and monitoring - securely and at scale

- ✓ Single cable PoE+ installation
- ✓ A full range of security standards including 802.1X, TLS, FIPS-140-2, SSH, and SFTP
- ✓ Web-based setup (no programming required)
- ✓ Crestron XIO Cloud® - A cloud-based management platform that enables:
 - Set up once, scale up to mass room deployment and management
 - Remote control of any touch screen
 - Seamless management with any application you choose now or in the future

Gather intelligence, reallocate spaces, drive increased productivity

The combination of Crestron XiO Cloud and occupancy sensors optimizes your investments in space and technology.

Occupancy sensors deliver insights into room usage while also automatically releasing booked rooms back into inventory.

Crestron XiO Cloud management platform offers interactive dashboards with real-time usage data. Intelligence you can gather with no programming necessary.

Transform any space into a scheduled, productive meeting space

Crestron AirMedia® technology seamlessly connects to your calendaring platform, such as Office 365® or Google Calendar™, so open spaces are visible and available for booking. Even better, it supports Appspace® digital signage to enhance communications across your organization.
