The Venetian Macao Resort Hotel Shines Brighter With Crestron Lighting Control

The Venetian Macao Resort Hotel is the largest single structure hotel in Asia and the second largest building in the world. The hotel is a renaissance Venice-themed property featuring stunning replicas of Venice landmarks such as St. Mark's Square, the Doge's Palace, Campanile Tower, and canals with real gondolas and singing gondoliers.

The Venetian Macao boasts 3,000 all-suite guest rooms, large meeting, convention and exhibition spaces, unlimited retail space, a 15,000-seat arena, 1,800-seat theatre, and the largest casino in the world. The luxury resort provides spectacular facilities, attractions and amenities, creating unforgettable experiences for guests of all ages,

Crestron technology enables the Venetian Macao to provide the ultimate in luxury accommodations and increased service efficiency for its guests, and reduced operating costs to its bottom line.

Crestron audio and video distribution, and lighting control systems are installed in VIP Suites, the Paiza Club and meeting rooms, enabling the Venetian Macao to provide the ultimate in luxury accommodations and increased service efficiency for its guests, and reduced operating costs to its bottom line.

High Roller Suites

Reserved for high-rollers and VIPs, the Venetian Macao offers 34 opulent Paiza Suites and 64 Hospitality Suites. Each suite includes multiple bedrooms and bathrooms, a media room, spacious living and dining areas and a butler's pantry.

Centralized lighting control is provided by a PAC2M processor, 4-channel electronic low-voltage CLXI-1DELV4 dimmer module, and 4-channel CLXI-1DIM4 dimmer modules. Guests are free to adjust lights and drapes from Cameo keypads, creating any mood they desire.

In room entertainment, thermostats and audio/video systems are integrated and automated using a Crestron advanced PRO2 control system, and a variety of touchpanels - including a TPMC-4X WiFi handheld, TPS-15G-QM, TPS-2000L, and TPS-4000 - provide easy-to-use intuitive user interfaces.

The Paiza Club

The Paiza Club, a private gaming area reserved for high rollers, is divided into several private game rooms. A PRO2 processor controls audio and video distribution throughout the club using TPS-3000, TPS-4000 and TPS-2000L touchpanels. The Crestron control system provides seamless integration and one-touch user control of audio and video entertainment, and lighting throughout the exquisite club.

Meeting and Conference Rooms

The cavernous meeting areas can be separated into numerous conference rooms of different sizes and configurations. Nine CP2E control processors enable high performance automation for multimedia AV presentation systems and lighting control. More than 100 APAD wall mount LCD controllers are installed throughout meeting spaces for simple selection of audio in the various zones, while a TPS-3000 touchpanel provides one-touch control of audio switching and distribution of background music, in addition to all lighting.

As more world-class hotels open on the Cotai strip, and with yet another proven enterprise hospitality implementation at the Venetian Macao, Crestron Asia will collaborate in the second phase of hotel expansion. Crestron integrated control systems will be implemented in the conference rooms and Presidential suites at the new Four Seasons property.
