The UC-MX70-NC-T Crestron Flex advanced tabletop conferencing system provides a large room conference solution for use with Microsoft Teams® Rooms software. It supports single or dual video displays¹ (not included) and features a Crestron Flex tabletop conference device, UC bracket assembly, microphone pod, power supply, and cables.

Native Microsoft Teams® Rooms Experience

The UC-MX70-NC-T system brings the full Microsoft Teams Rooms UC experience to any meeting space in an enterprise or SMB facility.

Intuitive User Interface with Impressive Audio

With a large 7 in. HD color touch screen and an integrated AEC-enabled USB speakerphone that affords full-duplex

wideband audio performance, the Crestron Flex Tabletop Conference device (CCS-UC-1-X-T-V) provides a superior conferencing and collaboration experience for meeting rooms, huddle spaces, and executive offices. The conference device also offers optional control of room lighting, shades, thermostats, and other equipment.²

Simplified Deployment

To simplify installation, the UC Bracket Assembly provides preassembled components on one ready-to-mount bracket. The assembly can be mounted on a wall, or it can be attached to the rear of the display device. Crestron's direct connection method further simplifies installation with a single connection from the Crestron Flex tabletop conference device to the UC Bracket Assembly.³

High-Definition Video Conferencing

High-definition video conferencing can be achieved by utilizing the [IV-CAM-P12-B](#), [IV-CAM-P12-W](#), [IV-CAM-P20-B](#), [IV-CAM-P20-W](#), [IV-CAM-I12-B](#), [IV-CAM-I20-B](#), and [IV-CAM-I20-W](#) cameras. Microsoft Teams certified third-party cameras are also compatible with the system.

Crestron Control System Integration

The UC-MX70-NC-T integrates with a Crestron control system to enable touch screen control of room lighting, motorized window shades, climate control, AV, and other amenities.²

Bring Your Own Device (BYOD)

Conference room visitors can connect their laptop to the Crestron Flex system to use their own UC conference platform. The system's built-in content ingest device switches to the connected laptop's UC platform and returns to the native platform when disconnected.

Enterprise-Grade Security

Crestron Flex is an enterprise-grade solution, engineered in partnership with Microsoft® to integrate seamlessly into any Microsoft Teams Rooms software deployment. Crestron Flex is ideally equipped for mass deployment throughout any sized corporate, university, medical, military, or government facility.

Easy Provisioning and Device Management

The XiO Cloud® service is an IoT cloud-based provisioning service (available separately) that enables installers and IT managers to easily deploy and manage thousands of devices. The XiO Cloud service provides system alerts, network management and provisioning, and the pairing of a control device to the system's UC Engine. System updates are controlled by Windows® software update.

Premium-Level Support

Crestron Flex Care is an optional subscription service that automatically renews annually, providing 24/7 live remote technical support, an extended five year warranty on Crestron® branded hardware, expedited advance replacements, and a discounted rate for onsite support.

Visit www.crestron.com/flexcare for detailed terms and conditions and additional information.

Dual Control Option

A TS- or TSW- 70 series 10.1 in. touch screen may be added to the solution as an additional control point for the Microsoft Teams Rooms environment.^{2,3}
