

Flush Mount Kit for 6 in. or 8 in. Reference and Ultimate In-Ceiling Speakers, 1 Pair

The flush mount kit accessory for Crestron speakers made by Origin Acoustics is compatible with the following Reference and Ultimate speakers:

- [REFERENCE IC6-W-T-EACH](#)
- [REFERENCE IC8-W-T-EACH](#)
- [ULTIMATE IC6-AW-W-T-EACH](#)
- [ULTIMATE IC6-W-T-EACH](#)
- [ULTIMATE ICS8-AW-W-T-EACH](#)
- [ULTIMATE IC8-AW-W-T-EACH](#)

These kits allow for in-ceiling speakers to be mounted so the room-side surface of the speaker grille is flush with the drywall surface.

The flush mount kits are available in square (SQ) and circular shapes.

In the Box

- 1 SPKA-FMKT-IC6/IC8
or

Installation

Prepare the Mounting Hole

Before finalizing the speaker location, check to make sure there are no fixtures, pipes, air ducts, joists, or other possible obstructions. If applicable, use a good quality stud finder to locate joists.

To identify obstructions, do the following:

- Use a drywall saw to cut a small hole at a 45° angle. An angle cut simplifies repair since the removed piece can be reinserted to help plug the hole.

- Use a piece of stiff cable, bent into an L shape, with one end long enough to explore an area equal to the size of the speaker. Insert the cable into the hole, make sure it rotates freely in a complete circle and that there is sufficient depth.

If there are no obstructions, use the supplied template to trace an outline of the mounting hole on the ceiling. Cut the final mounting hole at a 90° angle to the ceiling.

Flush Mount Kit for 6 in. or 8 in. Reference and Ultimate In-Ceiling Speakers, 1 Pair

Install the Flush Mount Kit

Use the [SPKA-FMKT-IC6/IC8](#) and [SPKA-FMKT-IC6/IC8-SQ](#) flush mount kit to install the speakers on a room-side surface. This accessory must be purchased separately.

1. Fit the flush mount kit into the opening and ensure it sits flat against the drywall.

Circular Flush Mount Kit

Flush Mount Kit for 6 in. or 8 in. Reference and Ultimate In-Ceiling Speakers, 1 Pair

Square Flush Mount Kit

2. Use a Philips screwdriver to turn the screw inside each clamp to tighten the clamps and secure the bracket in the ceiling.
3. To secure the flush mount kit to the drywall, use a screw gun/drill to drive drywall screws through the mounting holes in the flange.

Finish the Drywall

1. With an applicator (not included), apply joint compound over the bracket to seal and blend the bracket into the ceiling.
2. Apply the joint compound beginning 6-8 in. (152-203 mm) from the flush mount kit's edge and then feather outward 16-20 in. (406-508 mm) to achieve a smooth, flat transition.

NOTE: Make sure that enough joint compound is applied around the flush mount kit to make a very gradual transition from the surface to the edge of the flush mount kit.
