

SW-USB-ETHERNET

Control System Software License Key for USB to Ethernet Adapter

The SW-USB-ETHERNET is an optional software license key for applicable Crestron 3-Series® and 4-Series® control systems. The software license key supports an external USB to Ethernet adapter, allowing connectivity to a network other than the primary LAN or Control Subnet.

The USB to Ethernet adapter creates a LAN environment when the Crestron control subnet is not suitable. The LAN created with the USB to Ethernet adapter is separate from the LAN created by the control system.

The SW-USB-ETHERNET is ideal in the following scenarios:

- Connectivity to an isolated network with devices that are not suitable or approved to exist on the Crestron control subnet
- Connectivity to a BACnet LAN
- Connectivity to a Dante® audio LAN, especially when multicast Dante traffic may be present

To obtain an SW-USB-ETHERNET license key for a supported control system, visit the [Licensing and Registration Hub](#).

Specifications

Compatible Control Systems

CP3, CP3N, AV3, PRO3, CP4, CP4N, AV4, PRO4, MC4, and RMC4 (FW v2.4508+)

Adapter Requirements

Chipset	SMSC-9500 or SMSC-9500A
Ethernet Communication	100/1000 Mbps

NOTE: While Crestron does not recommend or sell a specific adapter, the following models have worked successfully.

- PortSmith PSA1U1E
- PortSmith PSA1U1E-E
