

Price Reduction

The most intelligent, yet simple, point-to-point room solution

Now available at a significantly lower price

All the AV signal inputs you need

- + HDMI
- + VGA
- + Composite AV
- + DisplayPort

The Crestron Difference

Together, the compact DM-TX-401-C transmitter and DM-RMC-100-C receiver give you the most intelligent, robust point-to-point AV solution on the market. You get all the AV input signals you need; HDMI®, VGA, DisplayPort® and composite video and audio, plus long-distance DM transmission and comprehensive device control; RS232, USB, IR and Ethernet.

Only Crestron offers complete enterprise management and the combination of HDMI, DisplayPort, VGA, and composite AV inputs, plus DigitalMedia™ output and control of all connected devices in a single transmitter. The DM-TX-401-C enables managers to run system diagnostics, monitor status, and get reports over the network.

Long distance DM transmission & comprehensive device control

- + RS232
- + USB
- + IR
- + Ethernet

Network management

- + System diagnostics
- + Monitor system status
- + Analyze reports

Even better, now you can get all of this connectivity and versatility for a lot less.

Effective immediately, the price of the DM-TX-401-C is reduced from \$2,500 to \$2,000 (MSRP)

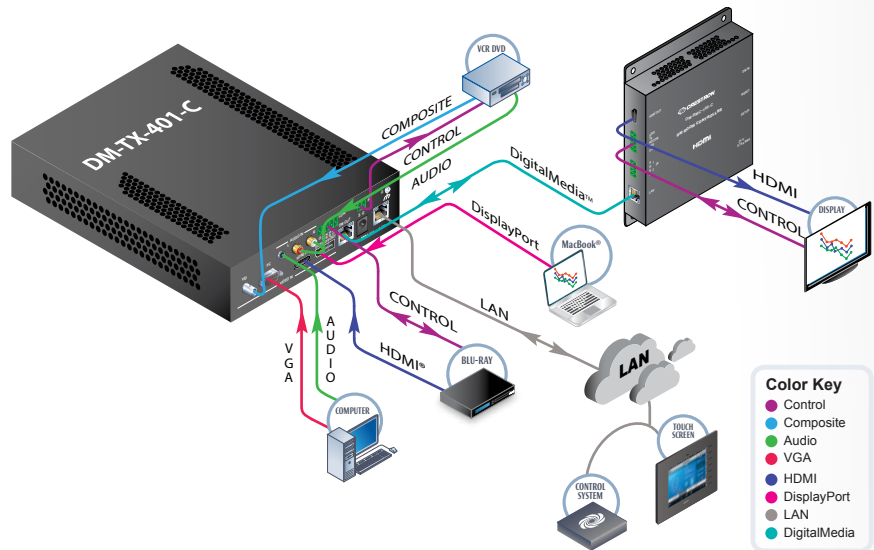

When bidding on projects that require dozens or even hundreds of units, the new lower price can give you a big competitive advantage.

Perfect for both installed and BYOD sources

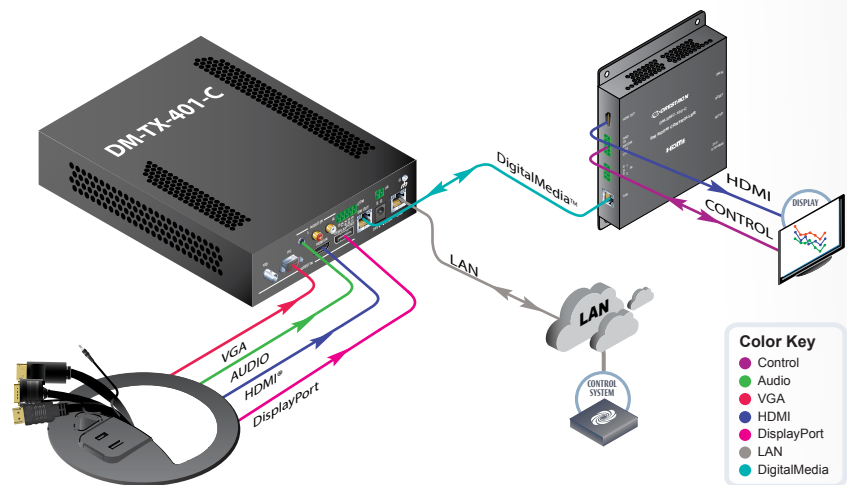

The DM-TX-401-C provides a simple, inexpensive solution for managing installed in-room sources typically found in boardrooms and auditoriums, as well as BYOD sources in small meeting rooms, classrooms and huddle rooms. Additionally, it seamlessly integrates all sources into the DM® system. The DM-TX-401-C transmits any analog or digital AV signal long distance over a single CAT5e cable.

The Industry Standard for HD AV signal distribution

Crestron DigitalMedia remains the only proven, reliable, end-to-end enterprise signal management solution, now supporting emerging technologies such as streaming, wireless, and 4k. Learn more about how DM is advancing AV distribution for tomorrow's world.

Installed in a lectern equipped with a Crestron touch screen, anyone can easily select from and instantly switch between multiple sources, such as PC, Mac®, Blu-ray Disc®, or VCR.

Integrated with the Crestron Connect It™ (TT-100) one-touch tabletop interface, users can easily connect their laptop or iPad® and instantly start presenting. No matter what device they bring into the room, they'll enjoy the peace of mind that comes with knowing the connectivity they need is already there.
