

GLPANEL Finish Kit System

The GLPANEL Finish Kit (FK) system adds accessories such as sensors, keypads and touch screens to provide a complete GLPANEL SpaceBuilder solution.

System Components

Keypads

Up to 20 keypads can be added to a GLPANEL FK space. Refer to page 4 for standard sequence of operations to specify the button operations and standard engravings.

Occupancy Sensors

Up to 20 dual technology occupancy sensors can be added to each GLPANEL FK space for either occupancy or vacancy sensing. Each sensor offers coverage for spaces up to 2,000 square feet. Sensor coverage varies based on type, see detail at end of this worksheet. Sensor defaults to vacancy operation unless noted as occupancy operation in the space part number.

Daylight Sensors

Up to 4 daylight sensors can be added to each GLPANEL FK space for daylight harvesting control. Open-loop and closed-loop options are available.

Touch Screens

The GLPANEL FK systems comes with 7" or 5" portrait touch screen options to be used for both system set up and master control by the end user.

Options

AV Integration

The GLPANEL FK system can easily integrate with AV systems by adding a control port module. If this options is selected, Crestron will also supply prepackaged code for the AV contractor to connect the systems.

Shade Integration

Integrate with Crestron and other shading solutions. Control for up to 4 local shade motors can be included with each GLPANEL FK system.

Networking

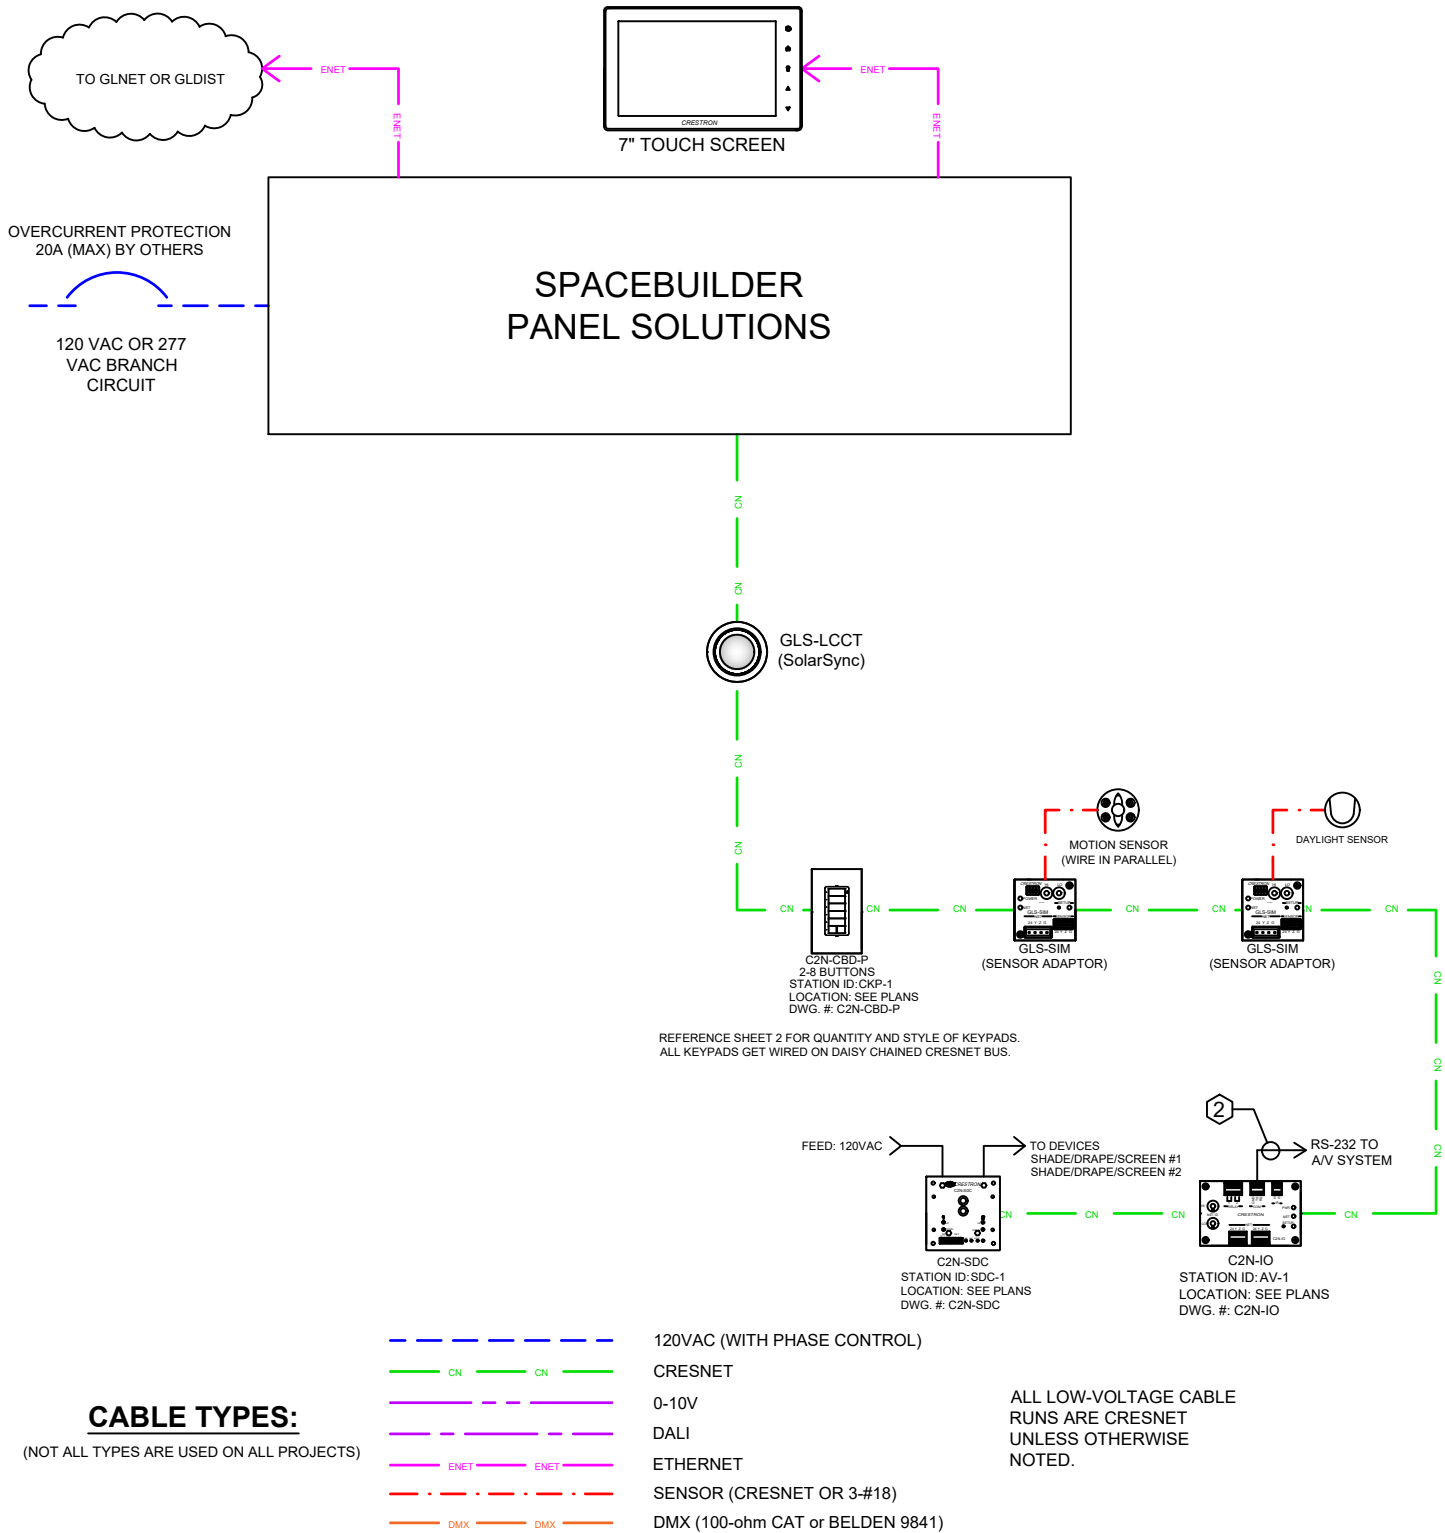

Any Crestron SpaceBuilder system can be networked to provide centralized monitoring, management and master control. This includes direct integration with BMS and reporting, alerts, global time clock management, maintenance, and automation via Crestron Fusion®.

Crestron SolarSync™

GLPANEL FK space can be enhanced with Award winning Crestron SolarSync technology using the industry's only commercial lighting CCT and intensity sensor (GLS-LCCT). Adding the "SYNC" option to the GLPANEL FK space will allow tunable white fixtures to match the color of the measured sun light for smooth transitions from natural to artificial light.
