

# GLCAEN-FT System

The GLCAEN-FT SpaceBuilder system is ideal for spaces where distributed or wireless controls are not appropriate. GLCAEN-FT is great for spaces that do not have accessible ceilings such as auditoriums, warehouses, sports venues, large parking structures. With many options the GLCAEN-FT feed through solution supports all analog dimming loads. GLCAEN-FT is a quickly configured and shipped feed through panel solution. Combine with the GLPANEL finish kit for a complete turn-key centralized lighting control solution.

## Modules

### Switched

Fully rated 16 amp switched loads are supported with the SW4 option. 120 VAC only.

### 2-Wire Forward Phase Dimmed

4 Amp forward phase dimmed loads are supported with the DIM8 option. 120 VAC only.

### 2-Wire Universal Phase Dimmed

4 Amp forward or reverse phase dimmed loads are supported with the DIMU8 option.

### 4-Wire 0-10v Dimmed

Fully rated 16 Amp switched or 0-10v loads are supported with the LV8 option

### Processor

The PROC option adds a 3-Series processor to allow for an autonomous lighting control system with astronomical time clock.

### Ethernet Uplink

The EN option allows for the panel to uplinked to a control system via Ethernet.

## Options

### Assembly

GLCAEN-FT systems can be factory assembled in Crestron's UL508 panel shop, or they can be shipped as empty cabinets and loose modules.

### Voltage

120 or 277 VAC feed through styles are available.

### Networking

GLCAEN-FT systems have the option to be Ethernet or Cresnet connected for easy scalability.
