The DMC-4K-C-HDCP2 is an input card designed for use with any card-based Crestron® DigitalMedia™ Switcher. It provides one DM 8G+® input, with complementary HDMI® pass-through and analog audio outputs. Using a single CAT type twisted pair cable, the DM 8G+ input enables the connection of a DM 8G+ transmitter, the output of another DM® switcher, or an HDBaseT® certified source.^[1]

NOTE: Refer to model [DMC-4K-C-DSP-HDCP2](#) for use with surround sound sources.

4K Ultra HD

The DMC-4K-C-HDCP2 features the latest DM 8G+ technology, providing support for the transport of 4K and Ultra HD video signals. Support for 4K video also ensures support for the latest generation of computers and monitors with native resolutions beyond 1080p and WUXGA.

DigitalMedia 8G+®

Engineered for ultra high-bandwidth and ultimate scalability, DigitalMedia 8G+ (DM 8G+) provides a true one-wire lossless transport for moving high-definition video, audio, power, Ethernet, and control signals over twisted pair copper wire. DM 8G+ handles uncompressed Full HD 1080p, Ultra HD, 2K, and 4K video signals with support for HDCP 2.2, Deep Color, 3D, and high-bitrate 7.1 audio. All signals are transported over a single CAT type cable, supporting 1080p, WUXGA, and 2K signals at distances up to 330 feet (100 m) using Crestron [DM Ultra Cable](#), Crestron [DM 8G® Cable](#), or third-party CAT5e. Higher resolutions up

to UHD and 4K are supported at distances up to 330 feet (100 m) using DM Ultra Cable, 230 feet (70 m) using DM 8G Cable, or 165 feet (50 m) using CAT5e.^[1]

HDBaseT® Certified

Crestron DigitalMedia 8G+ technology is designed using HDBaseT Alliance specifications, ensuring interoperability with other HDBaseT certified products. An HDBaseT compliant device can be connected directly to the DM 8G+ input on the DMC-4K-C-HDCP2 without requiring a DM transmitter.

HDMI® Pass-Through

Every DM switcher input card includes an HDMI output port, which can be used to pass the input signal through to a local audio processor or video monitor, or to feed a second DM switcher for output expansion purposes.

Audio De-embedding

The DMC-4K-C-HDCP2 also includes an unbalanced analog audio output, allowing stereo audio signals to be extracted from the digital input and fed to a multiroom audio distribution system. The output volume is adjustable via a control system using a keypad, touch screen, handheld remote, or mobile device.^[2]

NOTE: For applications requiring the simultaneous distribution of multichannel surround sound and 2-channel stereo audio signals, use model [DMC-4K-C-DSP-HDCP2](#).

Power over DM®

Power over DM (PoDM) technology affords a true one-wire solution by supplying power to the connected device over the same wire that carries video, audio, and data signals. To enable PoDM power sourcing through the DM 8G+ input port (DM IN), simply connect a compatible PoDM or PoE power source to the PoE/PoDM input port (POE IN). Compatible power sources include Crestron models [DM-PSU-8](#), [DM-PSU-16](#), [DM-PSU-ULTRA-MIDSPAN](#), and [CEN-SWPOE-16](#), or any IEEE 802.3af or 802.3at compliant PoE PSE (Power Sourcing Equipment).

Support for PoDM+ is enabled using a DM-PSU-ULTRA-MIDSPAN, CEN-SWPOE-16, or third-party 802.3at Type 2 PSE. PoDM++ power sourcing is enabled using a DM-PSU-ULTRA-MIDSPAN. PoDM may also be used to power HDBaseT PoE powered devices.^[3]

Notes

1. The maximum cable length for DigitalMedia 8G+ (DM 8G+) or HDBaseT is dependent upon the type of cable and resolution of the video signal. Refer to the "Maximum Cable Lengths" table for a detailed overview. Crestron legacy cable models [DM-CBL](#) DigitalMedia Cable and [DM-CBL-D](#) DigitalMedia D Cable support the same resolutions and cable lengths as CAT5e. Shielded cable and connectors are recommended to safeguard against unpredictable environmental electrical noise which may impact performance at resolutions above 1080p. Refer to the [Crestron DigitalMedia Design Guide, Doc. #4546](#) for complete system design guidelines. DM 8G+ is compatible with HDBaseT Alliance specifications for connecting to HDBaseT compliant equipment. All wire and cables are sold separately.
2. The analog stereo audio output is only active when the input source is outputting a 2-channel stereo signal. For applications using a multichannel surround sound source, use model [DMC-4K-C-DSP-HDCP2](#) which provides simultaneous surround sound and stereo downmix output signals.
3. To enable PoDM or HDBaseT PoE power sourcing via the DM IN port, the POE IN port must be connected to a PoDM power supply ([DM-PSU-8](#), [DM-PSU-16](#), or [DM-PSU-ULTRA-MIDSPAN](#)) or an 802.3af or 802.3at compliant PoE PSE ([CEN-SWPOE-16](#) or third-party). PoDM+ and HDBaseT PoE+ are supported using the DM-PSU-ULTRA-MIDSPAN, CEN-SWPOE-16, or other 802.3at Type 2 Class 4 compliant PoE+ PSE. PoDM++ power sourcing is supported using the DM-PSU-ULTRA-MIDSPAN. Refer to the connected DM 8G+ or HDBaseT device for its PoDM or HDBaseT PoE capabilities and requirements. Any wiring that is connected to a PoDM, PoE, or HDBaseT PoE PSE port is for intra-building use only and should not be connected to a line that runs outside of the building in which the PSE is located.
4. Item(s) sold separately.
5. DVI is supported via the HDMI output using a suitable adapter or interface cable. [CBL-HD-DVI](#) interface cables are available separately.
