

CONFERENCE ROOM CRESTRON .AV FRAMEWORK™

The conference room plays a key role in the way the modern office worker gets business done today. These rooms provide them with the technology to communicate and make business decisions in a larger group.

As the modern office worker transitions from a 9-to-5 in-office schedule to flexible hours and locations, the design of office buildings has transitioned as well. Conference spaces have become more important because the main reasons to come into the office are to meet with colleagues, vendors, and customers.

Enabling the conference space to work seamlessly with modern technology and keep them running is now a business critical task.

CONFERENCE ROOM

CRESTRON .AV FRAMEWORK

This room style:

- › Provides a gathering space for larger meetings
- › Enables users to present from any technology, wired or wireless
- › Must be kept up and running at all times

This room needs to support the following functions:

- › Share content wirelessly from a tablet, smartphone, or laptop
- › Present video on multiple displays
- › See the availability of the room and book it if needed
- › Real-time monitoring and troubleshooting of room's technology by IT

Crestron has designed this room to meet all of the above needs, in an economical, simple, scalable way. This is Crestron's conference room solution.

Key Products

Qty	Product ID	Product	Preview
2	DM-DGE-200-C	Digital graphics engine	①

1	TSW-752	Touch screen	⑦
1	TSS-752	Scheduling touch screen	⑧

①

②

DM-DGE-200-C

The ultimate room box features streaming H.264 video, 4K over HDBaseT®, and HDMI® inputs, transmits 4K over HDMI, delivers customizable 4K onscreen graphics and dynamic text, display control, and direct connectivity with Crestron Fusion®.

DMPS3-300-C

Enterprise-grade all-in-one HD presentation system, integrating a 3-Series Control System®, 7x4 multimedia switcher, mic mixer, audio DSP, amplifier, DM® distribution, and .AV Framework™ “no programming” set up.

③

EXCITE_IW5

In-wall speakers offering great sound quality, excellent value, and easy installation in for any room.

④

PP-100

PinPoint™ enhances the intelligence and personalization of your Crestron® system by enabling your iPhone® or iPad® to always know what room you're in.

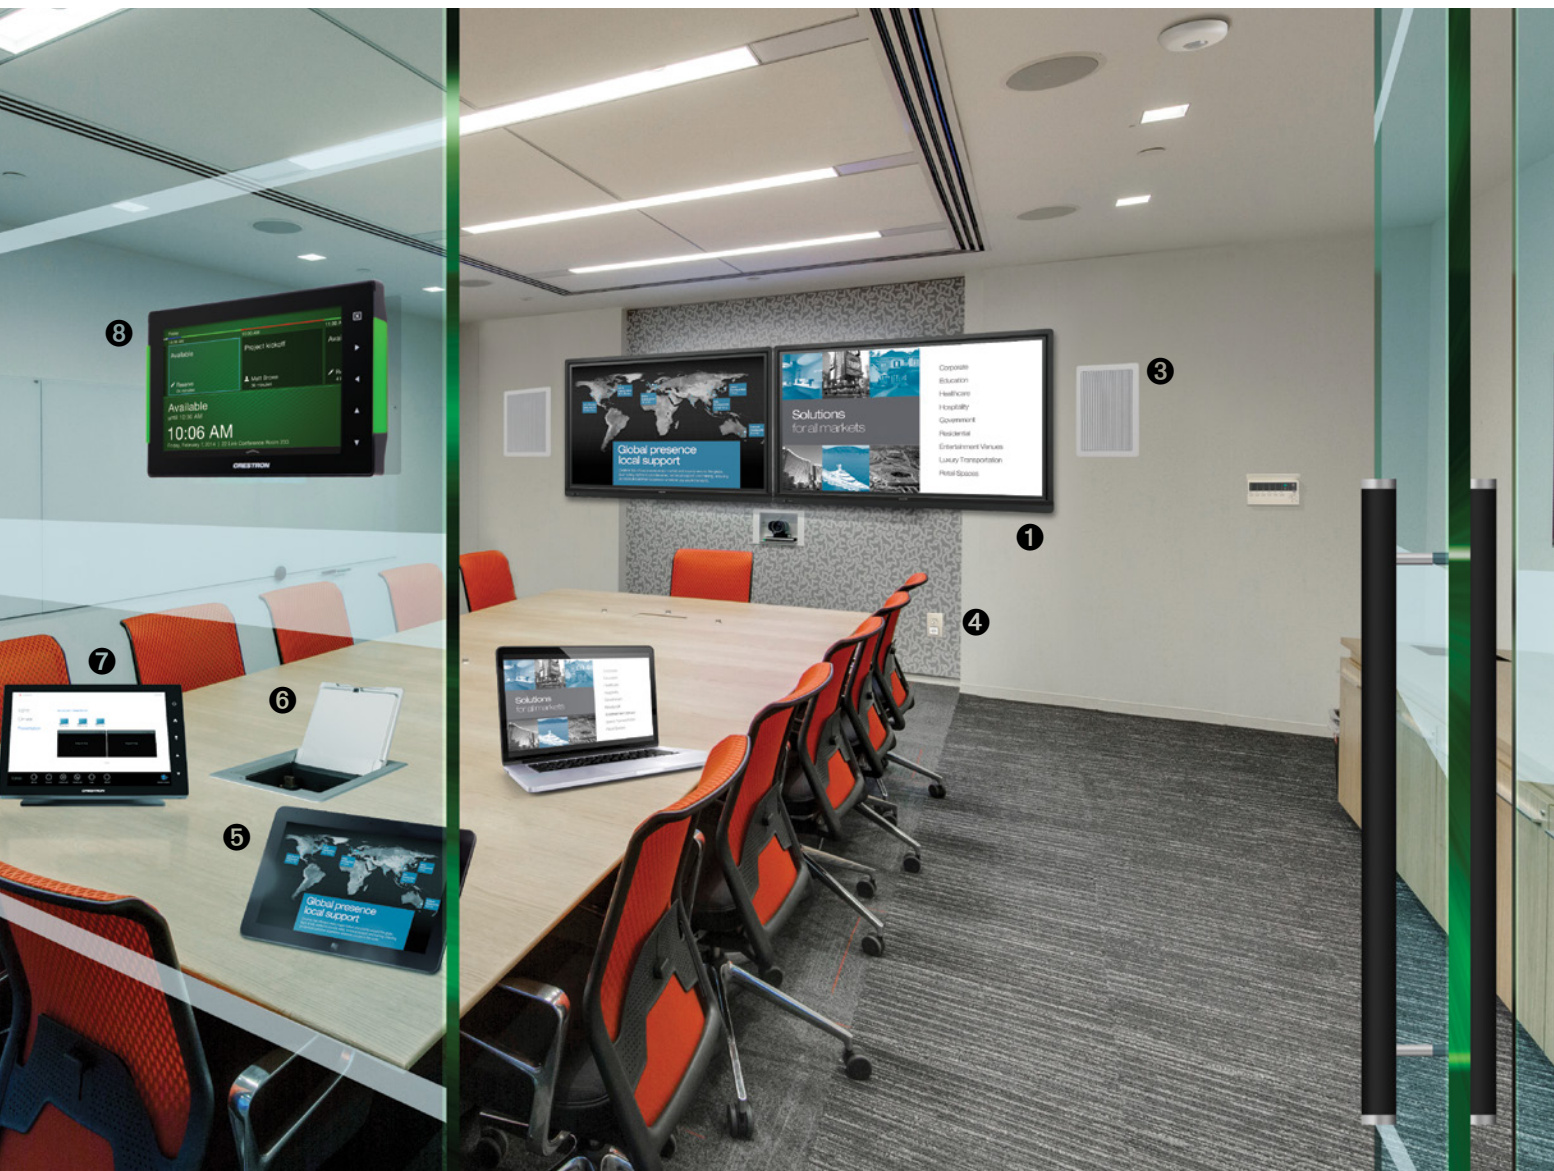

⑤

IDOC-PAD-LCA-DSC-W

Crestron® iPad® Table Dock for iPad Air® provides a very stylish solution for charging, while simultaneously using it to control your room.

FT-600

Provides a configurable connectivity solution in a stylish, flush mount tabletop design. Configurable with versatile combinations of pullout cables, cable retractors, connector panels, and AC power outlets.

TSW-752

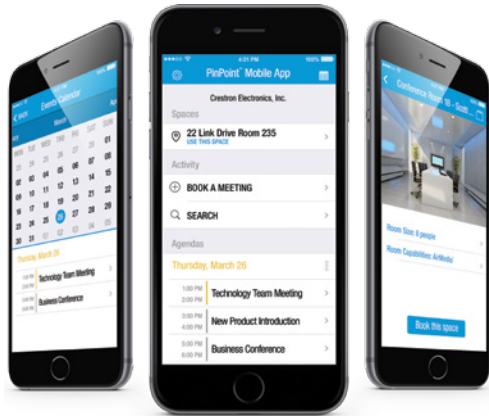

Capacitive 7 inch wall, lectern, or tabletop touch screen featuring a sleek design and advanced HD Smart Graphics™. Features voice recognition, Web browsing, H.264 streaming video, Rava® SIP Intercom, and PoE.

TSS-752

Capacitive 7 inch Crestron Fusion RV® room scheduling touch screen with versatile mounting options for installation outside of rooms.

Crestron PinPoint Mobile app

Find a room anytime you need one

The new Crestron PinPoint™ Mobile app makes enterprise technology a personal tool that you carry in the palm of your hand. Now, you can find and book any type of space you need with a few swift clicks on your phone.

A warm, welcoming experience

When entering the room you're presented with the PinPoint Room Experience on the main display, which tells you the schedule of the room and ways to present in the space. No longer are you faced with a blank screen and frustrated that you can't figure out how to use the room.

The room interface also provides a clear indication of whether the space is available, and gently reminds you when your meeting time is almost up.

Smart wireless presentation

You can present wirelessly on the room display from virtually any device using Crestron AirMedia™. Using PinPoint location beacons, your smart device also knows which display you're near and will present your content on that display with one button press.

No-compromise 4K video

You can present in the room from a wired laptop source using VGA, DisplayPort or HDMI® and get zero-latency beautiful video on the screen at up to 4K resolution. Your investment in the room is insured against obsolescence for even longer by supporting the latest video formats.

Drop-in-place simplicity

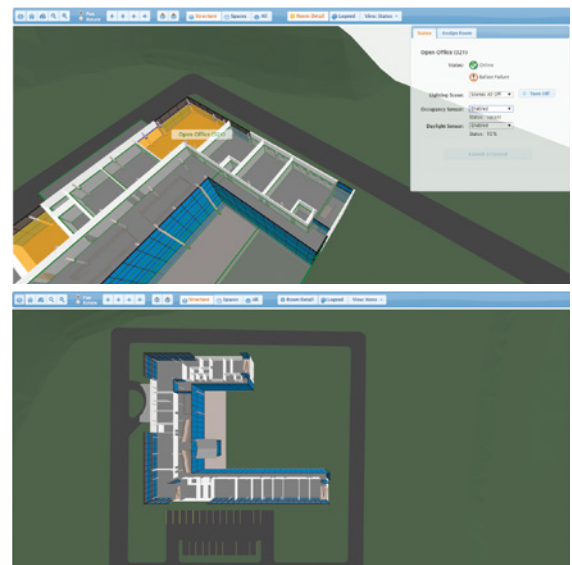

The Crestron .AV Framework™ platform is the foundation of the intelligent enterprise and this conference room. The entire room can be configured in just a few minutes with no programming. The infrastructure is easy to install, always available, easy to use, scalable, repeatable, and manageable.

Centralized monitoring and control

The conference room automatically ties into Crestron's cloud-based or on-premises Crestron Fusion® monitoring and management technology. Crestron Fusion provides immediate alerts when an equipment failure is detected, such as an unplugged cable – so that it can be proactively corrected before it impacts the user.

Within Crestron Fusion, Fusion Insite™ provides managers with interactive, real-time 360-degree 3D visualization of entire buildings across the enterprise, the status of the individual spaces within them, and all the technology in the rooms.

Crestron Fusion 3D management software

Making data work for you

Crestron's Conference Room solution sends usage and maintenance data to the Crestron Fusion monitoring solution, enabling you to see how often rooms and equipment are used (or and abused – or at least overbooked, in the case of rooms) and where your failures occur most. Knowledge is power, and the Crestron conference room is empowering you with the data you need to increase productivity and efficiency.
