

CL-SPACEBUILDER-ZUMDIN

SpaceBuilder® System - Zum® DIN Lighting Control

The [CL-SPACEBUILDER-ZUMDIN](#) SpaceBuilder® system is an ideal lighting control system for any space, new construction or retrofit. It provides centralized lighting control solutions utilizing [Zum® DIN](#) lighting control devices and standard DIN modules.

[SpaceBuilder](#) allows you to define your space and how it works at the time of design. Use the SpaceBuilder tool to select your options and needs for the lighting control system. Once the CL-SPACEBUILDER-ZUMDIN system has been built, use the Crestron Zum App to operate the system using keypads, sensors, or time clock control.

Zum Net Wired Technology

In a Zum network, Zum Net load controllers facilitate communications of multiple rooms via Ethernet and can be daisy-chained for network expansion. Each device in the chain communicates to a Zum Hub control system for centralized monitoring, management, and reporting. Zum Net devices interconnect via [CBL-CAT5E-NET-P](#) CAT5e cable (sold separately) to provide in-room lighting control.

Zum Link Wired Technology

Zum Link technology enables in-room lighting control through keypads and sensors wired to controllers. Zum Wired devices connect via [CBL-CAT5E-ZUMLINK-P](#) CAT5e cable (sold separately) to provide simple daisy-chaining and lighting control of compatible loads and interfaces.

Energy Management and Efficiency

Connected load controllers are capable of energy monitoring through custom programming. Occupancy sensor, vacancy sensor, and daylight sensor connectivity enables significant energy savings. To reduce energy usage, lights can be turned off automatically when the room is vacant and dim gradually depending on the amount of natural daylight in the room.

Easy Configuration

Configured Zum devices work together in a local ecosystem to provide customized solutions using the Zum mobile app. Download the Zum app from the [Google Play™](#) online store or the [Apple® App Store®](#) online store.

NOTE: Crestron mobile apps are licensed under Crestron's Mobile Apps Terms of Use, available at www.crestron.com/Legal/mobile-apps-tos-privacy.
