

CLW-LDIMEX-2GD-W-T

Dual-Channel Wireless Lamp Dimmer, Ground Pin Down, White Textured

The CLW-LDIMEX is a plug in dimmer designed to operate as part of a complete Crestron® automation system communicating

via the infiNET EX® wireless control network. Without the need for additional control wiring, the CLW-LDIMEX easily acts in place of standard in-wall dimmer or light switch for conventional floor and table lamps.

infiNET EX

Ultra-reliable infiNET EX wireless technology provides steadfast two-way RF communications throughout a residential or commercial structure without the need for physical control wiring. Employing a 2.4 GHz mesh network topology, each infiNET EX device functions as an expander, passing command signals through to every other infiNET EX device within range (approximately 150 feet or 46 meters indoors), ensuring that every command reaches its intended destination without disruption^[1].

The CLW-LDIMEX communicates with a Crestron control system via an infiNET EX Wireless Gateway (model CEN-RFGW-EX, DIN-AP3MEX, or MC3^[2]). Up to 100 infiNET EX devices may coexist on a single wireless network, and every non-battery-powered device that is added to the network effectively increases the range and stability of the entire network by providing multiple redundant signal paths^[1]. Built-in Dynamic Frequency Allocation continuously monitors RF conditions, automatically selecting the clearest channel to prevent interference from neighboring networks, cordless phones, and microwaves.

Easy Installation

System design, installation, and upgrades using infiNET EX controlled dimmers could not be easier. Since there's no control wire required, the CLW-LDIMEX can be installed at any outlet and operate like any conventional dimmer.

ACCESSORIES

CLW-EXPEX-GD-W-T:

Notes:

1. Any infiNET EX device that provides expander functionality will effectively extend the range of the wireless network beyond the initial range of the gateway. Battery-powered infiNET EX devices do not provide expander functionality.

2. Item(s) sold separately.

3. Load may be split across both channels in the 2-channel model.
