

CM2-BTN-LG-TOP-W-T ENGRAVED

Cameo® 2 Backlit Engravable Pushbutton, Large, Top, White Textured, Custom Engraved

CM2-BTN replacement buttons are used with Cameo 2 dimmers, switches, and keypads. They are available in small, medium, large, and rocker sizes in all Cameo 2 colors.

Notes:

- **-RKR** devices can only use **-RKR** buttons.
- **-RKR** buttons can only be used by **-RKR** devices.

Button Engraving

Functions of each button can be identified with custom, laser-etched engraving. Engraving is included with ENGRAVED models.

Engraving files must be provided when ordering and can be created using Impress Custom Engraving Software, the Crestron Home® Setup app, or the Crestron Home Online Configurator. If necessary, custom engraving can be changed until the order is processed by emailing orders@crestron.com with the updated engraving file and order information.

Note: Buttons without engraving (BLANK models) are also available and can be used as is or can be custom engraved by a third-party engraver.

Multicolor Backlit Buttons and Indicators

Full keypad models have buttons with separately backlit custom engravings and indicators. Indicators are optional per

button and can be engraved in a line or dot aesthetic. Custom engravings and indicators are illuminated using the device's RGB LED backlights. Each button and indicator can be assigned custom color backlighting.

Feedback can be provided through indicators, custom engravings, or both. Feedback can be performed by turning on or off, changing intensity, changing color, or flashing to show that an action is being performed. Backlighting and feedback colors can be adjusted using Crestron Home software or other Crestron programming tools.

Local color theme sets the colors for custom engravings and indicators on the device. Each backlit area can also be assigned an alternate color theme. Thirteen local color themes are available that include Tunable White (default is Warm White), Neutral White, Cool White, Dim to Warm, Circadian (through Crestron Home), and a variety of common and custom colors. The local and alternate color themes can be changed programmatically.
