- > Limited Lifetime Warranty

NOTE: The CSM-QMTDC-DRP-3-CN is only available as part of a Crestron® drapery system and cannot be ordered on its own. To configure drapery systems or order drapery system parts and accessories, please use the Crestron Design Tool for Crestron Shading Solutions or call 1-855-53-S-H-A-D-E (537-4233) for support.

Featuring Digital Quiet Motor Technology™, the CSM-QMTDC-DRP-3-CN motor provides quiet yet robust operation for Crestron® Drapery Systems with tracks up to 240 inches (6096 mm).^[1] Fully integrated electronics eliminate the need for bulky add-on interface modules, allowing for an easy, streamlined installation. The CSM-QMTDC-DRP-3-CN uses the dependable Cresnet® wired network for communications. An infiNET EX® wireless version of the motor is also available (model [CSM-QMTDC-DRP-3-EX](#)).

The CSM-QMTDC-DRP-3-CN can integrate seamlessly into a Crestron control system to be operated from keypads, wireless remotes, and touch screens. For easy setup, a local three-button interface on the motor lets users test the drapery system after installation and set drapery limits. Power is supplied to the CSM-QMTDC-DRP-3-CN via dedicated Crestron power supplies, such as the CSA-PWS40 or CSA-PWS10S-HUB. The CSA-PWS10S-HUB is capable of distributing power to up to ten drapery motors from one unit.

Quiet Motor Technology

The drapery motor utilizes the quiet, precision-controlled Quiet Motor Technology to control the movement of the draperies, keep track of the drapery's position, and adjust the drapery to the user's desired preset positions.

Touch Motion Feature

By gently pulling on the edge of the drapery fabric, users can activate the CSM-QMTDC-DRP-3-CN to move the draperies along the track to an open or closed position. In the event of a power outage, a manual override feature allows users to manually move the draperies.

Cresnet

The drapery motor uses the dependable Cresnet wired network for communication between devices. The Cresnet bus offers easy wiring and configuration, carrying bidirectional communication and 24VDC power to each device over a simple 4-conductor cable.
